

FLEXIBLE SOFTWARE SOLUTIONS FOR THE AFTERMARKET DISTRIBUTION INDUSTRY

AutoPower – Payroll Module

AutoPower's Payroll module lets you set up employees as salaried, hourly, time card or piece work using a variety of pay periods that suit your company policy and each employee's pay and employment status.

Deductions can be withheld from the employee's payroll along with matching deductions by the employer. The module supports the assignment of multiple states and local tax codes to each employee. Easily determine employee and federal tax deposit payments. AutoPower provides the latest payroll tax updates that will be used to calculate payroll taxes and print end of year W-2 and W-3 forms.
