Our System = Your Profit

How much profit your business is making might be the most important number you'll ever want to know as a business owner. How to be more profitable is the most important goal and we can help!

Since 1978, AutoPower has helped business just like yours by utilizing "Profit by Intention" across their entire organization. Backed by decades of industry expertise, we've developed industry specific solutions infused with the innovation that assures your business model remains relevant, competitive, efficient and more profitable by intention.

At AutoPower, our solutions continuously evolve to match industry and customer needs with over 40 major application modules that can be configured for an exact fit to power your business. For businesses of all sizes, our unique "Profit by Intention" design is evident in these modules:

Inventory Management

Inventory · AIN · EDI · Kitting · Cores · Multi-Branch Purchasing · Dead Stock · Barcode Scanner

Improve inventory management and planning performance with enhanced abilities to monitor inventory turns, customer demands and optimal stocking levels across single and/or multi-warehouse operations.

Warehouse Management

Purchasing · Barcode Scanner · Receiving · Delivery Signature · EDI · Cores · Barcode Labeling · Star Ship

Make intelligent purchasing decisions using vital stocking information at your fingertips; efficiently receive and put away stock using bar code technology. Also, you'll better manage the purchase of stock and non-stock products; implement advanced EDI controls; produce product and shipping labels; invoices, packing lists and email shipment details to the customer. Additionally, create shipping documents and labels with integration into major shipping carriers: UPS, FedEx, USPS, and LTL.
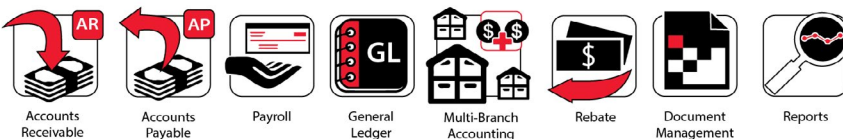

Sales Management

Handle complex pricing requirements that are typical for many distributors, including matrix pricing, pricing discounts, quantity breaks, fleet pricing, contract pricing and promotion pricing. Reach and retain new markets through streamlined ordering that includes B2B and B2C E-Commerce. Also, fast order-entry process with item alternates, non-stock and special order options, optimized counter sales and the ability to receive and process EDI purchase orders from customers.

Service/REMAN

The AutoPower Vehicle Service and Repair module provides you the tools to manage both the one-off drive-in business work and lucrative long-term fleet service contracts. The AutoPower Assembly and Rebuilders (REMAN) Module is designed to manage and unite prime business processes including recovery, cores and parts inventory, and utilization of cores in your remanufactured assemblies.

Financial Management

Increase your financial visibility and insights with fully integrated accounting modules that encompass the unique challenges of operating multiple branches and companies. Greater financial management over your business provides better management of your margins and improves your bottom line profitability.

System Applications
