

Job Title: Entry Level Programmer

We are seeking an enthusiastic and motivated individual to join our dynamic team as an Entry-Level Programmer. In this role, you will contribute to the development and maintenance of our current and future software products. While formal education is preferred, it is not required as we are committed to providing comprehensive training to the right candidate.

Key Responsibilities:

- Collaborate within our team to develop and maintain our software products.
- Learn and apply programming skills to enhance our software solutions.

Qualifications:

- Proficiency in at least one programming language. Candidates will be expected to demonstrate programming proficiency by writing a simple program during the interview process.
- Strong communication skills in both verbal and written forms.

Desired Programming Knowledge (not required):

- Java or C#
- HTML and CSS
- JavaScript and JavaScript frameworks
- Object-oriented design concepts
- Database concepts
- Source code control
- Familiarity with Unix/Linux/Windows OS

Desired Business Knowledge (not required):

While not mandatory, familiarity with the following business domains will be considered advantageous:

- Accounting
- Inventory management
- Warehouse management
- Vehicle service shop management

Benefits:

- Comprehensive training.
- Opportunities for professional growth.
- Health, Dental, and Life Insurance Benefits.
- Retirement Plans.

About AutoPower:

At AutoPower, we've been leading the way since 1978, providing innovative "Profit by Intention" integrated business systems that redefine supply-chain efficiency. AutoPower is not just a software provider; we are a trusted partner in our client's journey toward success. Our advanced system offers powerful transaction processing engines and industry-specific software, tailored to businesses requiring:

- Inventory and Warehouse Management
- Vehicle Services
- Assembly Manufacturing
- Sales Processing and Analysis Tools

With fully integrated financial modules, the AutoPower System delivers enterprise-wide features and functions, ensuring our clients stay ahead in an ever-evolving industry.

Our Culture:

At AutoPower, our culture is rooted in innovation, collaboration, dedication, and a passion for excellence. We value creativity, hard work, and a commitment to customer success. We are a team of diverse professionals who share a common goal - to help our clients thrive in a competitive market.

How to Apply:

Interested candidates are invited to submit their resume and a cover letter outlining their programming experience and motivation for applying to AutoPower to careers@autopower.com.

AutoPower is an equal opportunity employer and encourages candidates from all backgrounds to apply.
